

Safe-Sitter™ Replacement Harness Instructions

Please Read All Instructions Before Beginning the Installation.

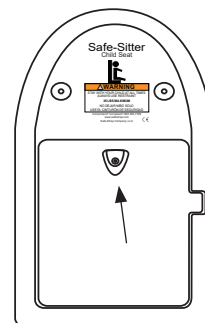

Tools Required: Screwdriver  Allen Key 1/8" 

Remove the Safe-Sitter from the wall. Lie the Safe-Sitter on a flat surface.

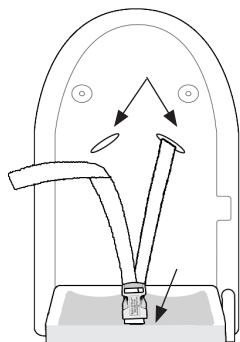

Remove the machine screws from the back of the Safe-Sitter and from the bottom of the seat door.

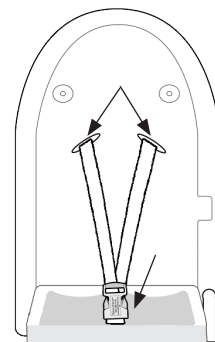

← Back of the Safe-Sitter
Bottom of the seat door. →

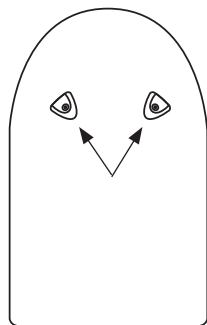

Pull old harness
from all cavities.

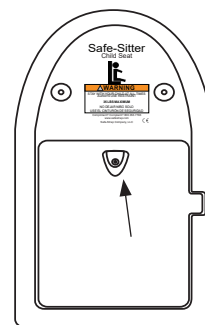

Pass the new harness
ends through all of the
cavities. Make sure that
the Safe-Strap logo on
the child resistant buckle
is facing to the front.

Secure the harness to the Safe-Sitter with the machine screws you previously removed.
Tighten machine screws on the back of the Safe-Sitter and on the bottom of the seat.

← Back of the Safe-Sitter
Bottom of the seat door. →

Pull harness to assure that it is tight. Reinstall Safe-Sitter onto wall following the Safe-Sitter installation instructions.
